

CONSIDUS dry storage systems from ASYS

Whenever perfect storage is required!

Dry, reliable, customised - Our CONSIDUS dry storage systems from ASYS offer the ideal solution for storing sensitive assemblies and components. They are used when precise humidity conditions or active component drying are required.

The innovative technology of our dry storage cabinets is indispensable in various sectors such as the pharmaceutical industry, the electronics and semiconductor industry or the aerospace industry. Whether it's electronic components, printed circuit boards or films with vulnerable surfaces - our dry storage systems create the perfect environment to ensure the quality of essential components.

Our range of services includes

- Incoming goods and technical quality inspection
- Storage in accordance with MSL levels and JEDEC-033 standard
- Exclusive use of LTS-compliant material
- X-ray fluorescence testing prior to storage
- Separate storage and "onion packaging"
- Batch ID labelling for LTS items
- ESD-compliant storage facility
- Stable residual moisture of 2-5 % with nitrogen flooding and continuous monitoring of residual moisture and residual oxygen.

Dehumidification technologies

- Adsorption dehumidification technology
- Nitrogen dehumidification technology

Rely on us for a reliable and state-of-the-art solution to your storage requirements.

We look forward to hearing from you:
